# Brushes

## Real Techniques Brush Attributes

Each brush is comprised of an average of 20,000+ bristles individually packed to perfection

Unlike many natural hair brushes, synthetic bristles are more durable and safer for use with liquid cosmetics

Non-porous synthetic fibers absorb less of your makeup for longevity and make cleaning as easy as 1, 2, 3

Aluminum ferrule, PU fibers, and rubberized handle provide a durable, quality, shed-resistant tool

Crimped and tapered to mimic real fibers; the quantity of bristles ensure the most touchpoints on your face for an ultimately flawless lay down of product

# BRUSH ANATOMY

We've combined quality materials with innovative designs to easily create any look.

- 1 UltraPlush® synthetic bristles** are custom-cut for a soft, streak-free finish
- 2 Prestige inspired numbering system** for easy reference of your favorite tools
- 3 Extended aluminum ferrules** for light weight, easy-to-use application

# Prep

The pre-makeup essentials. From cleansing, moisturization, and exfoliation, to relaxation and revival; the prep tools prepare your skin for seamless, long lasting makeup application.
